ED TEMPLETON

Birthdate: 7/28/72

Where did you grow up?

Huntington Beach, CA

Years skateboarding: 11

Years pro: 7

Favorite skate spot: It used to be Huntington Beach High School, but I don't have one now.

First tricks you learned: boneless off a chair, tictacks, carving

Who influenced you in the most in skateboarding? Jason Lee, Mark Gonzales, Mike Vallenty, myself (It's good to influence yourself, then you don't follow.)

Favorite bands: Fugazi, Sonic Youth, punk, metal, mambo

PART/LOCATION		GENERAL PRODUCT INFORMATION		WRITE IN YOUR SELECTIONS	
1	 DECKS Pages 4-17, and 29	Decks are available in wood and/or slick and they come in a variety of sizes. Wood bottomed decks are constructed of 7-ply Hard Rock Maple. Slicks are 7-ply maple with a thin layer of plastic on the bottom which allows them to slide easier. Approximate width and length are provided along with our decks to aid you in your buying decisions. Personal preference and experience best determine what size deck you should ride. All of the decks on pages 4-16, and 29 are good for all types of skating. The longboards on page 17 are best for cruising and transportation.		Page # _____	Code _____
2	 TRUCKS Pages 18 & 19	Trucks come in various heights and widths. Truck axle width should be closely matched to your deck width – it is okay to go a little wider than the deck, but if your axle width is shorter than your deck width, then the ride may be less stable. Truck heights only differ by about 1/4". If you use bigger wheels then you should either use higher trucks, risers, or both to avoid wheelbite (contact of wheel with decks during sharp turns).		Page # _____	Code _____
3	 WHEELS Pages 20-23, and 29	Wheel sizes range from 45mm to 112mm. Most of our wheels are below 60mm, made of high-quality hard urethane and are best for skating street. Wheels above 60mm are usually made of a softer urethane, and are better for skating fast or for cruising on a longboard.		Page # _____	Code _____

4	 BEARINGS Page 24	All of the bearings that we offer are high-quality pre-lubricated precision bearings. Bearings can be installed or removed with skateboard tools like the ones on page 27. To extend the life of the bearing, maintenance lubrication is recommended (for lubricants, see page 27).		Page # _____	Code _____
5	 GRIP TAPE Page 24	Grip tape is a modified form of sandpaper produced specifically for skateboarding. Its abrasive grit provides the traction necessary for staying on the board. An unfortunate side effect is that it also lessens the lifespan of the rider's shoes.		Page # _____	Code _____
6	 RISERS Page 25	Risers add to the height at which the skateboard rides, and are used to eliminate the chance of wheelbite during turns. For wheels between 50 and 58mm, CCS recommends the use of 1 set of risers, which is included with our completes. For wheels above 58mm, we recommend you purchase 1 or more extra sets (in addition to the 1 included set). However, these are only recommendations, and you may want to experiment with different ride heights. Foam pads like Shorty's Shock Pads and Short Stacks reduce impact pressure and vibration (see page 25).		Page # _____	Code _____
7	 HARDWARE Page 25	CCS uses 1 1/4" bolts on our completes because they will fit up to 2 sets of risers. When using 3 risers, use 1 1/4" or 1 1/2" bolts. With 4 or more risers you will need at least 1 1/4". Some bolts come in allen or phillips head, which only affects the installation and removal, not the ride.		Page # _____	Code _____

TIPS FOR THE NEW SKATEBOARD OWNER

WATER DAMAGE If you want your skateboard to last, stay out of the water! It will rust your bearings, cause your deck to come apart (delaminate), and eventually destroy your bushings. Avoid wet conditions.

BOARD BREAKAGE The main cause for cracks or breaks is improper foot placement when landing jumps. CCS will not replace broken boards or ones with pressure cracks, so skate smart.

ADJUSTMENTS TO COMPLETES Since the nuts may loosen during shipment, make sure they are secure when you receive your complete. Even though all the hardware is self-locking and should stay snug, check it regularly anyway. Your trucks' king pin nuts should be tightened or loosened to turn to your liking. At first, you may notice that it seems like the trucks stick to one side or that all of the wheels don't touch the ground when you step on your deck. This is due to the new urethane bushings in the trucks. The bushings will take time to break in, depending on the amount of use the trucks receive. Also, wheels should have a slight bit of "play" without being loose.

SKATE SAFELY Don't skate beyond your ability. The skateboarders pictured in this catalog are professionals, and we would make them wear safety gear if we could. Do not follow their bad example. Always wear safety gear and watch for traffic. Safety gear is located on page 32.

CAN IASC HELP YOU?

INTERNATIONAL ASSOCIATION OF SKATEBOARD COMPANIES

IASC sends along thanks to the 70,000 skateboarders who helped change the world. Over the past two years letters, postcards, faxes and phone calls from skateboarders around the world helped convince California's lawmakers to change the state's liability laws. Is it time to change the laws in your state, or your community? California's new law went into effect on January 1, which means California cities can now build public skateparks — insurance and liability are no longer that big of an issue in California. If you live in California you can look forward to the construction of more than 50 new public skateparks this year.

IASC has been able to help California's skaters, and now, if you live outside California, maybe we can help you too. If you can help us, we'll be able to help you! If you'll do some work on your end, we'll be more efficient on ours — we need contacts in your community. The names, phone numbers and addresses of your city's or town's officials: Mayor, City Council, City Manager, Parks and Recreation Director, Youth Activity Director, Chief of Police, and State Legislators. The more information you can provide us, the more effective we can be.

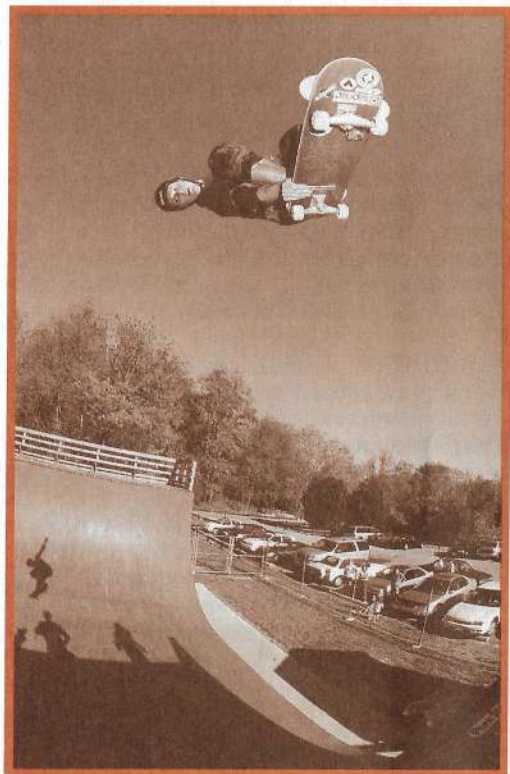

So, please, **SEND**, via the U. S. Mail, or e-mail, the information mentioned above — if you don't know where to start, try your local librarian! Help IASC, and IASC will help you!
